PROFILE

Senior Software Engineer specializing in backend, security, and distributed systems. I am part of Mercado Libre's Sessions team, where I work on core mobile and web authentication APIs in Go and Java. I am also the team's AI lead, focused on agents, workflows, and internal productivity tools.

EXPERIENCE

Mercado Libre Dec 2022 – present

Sessions · Backend

Sr. Software Engineer Feb 2026 – present

SSr. Software Engineer Jan 2024 – Mar 2026

Software Developer · Backend Dec 2022 – Feb 2024

- Development and operation of core mobile and web authentication APIs for Mercado Libre and Mercado Pago.
- Work across Sessions, Device Signing, SSO, and banking sessions for Mexico, focused on availability, performance, and security.
- Design of internal agents, workflows, and plugins that accelerate the team's development process.

Mundo Caño Oct 2018 – Dec 2022

Systems and e-commerce administrator

Administration of systems, information, product catalogs, online sales, and web services.

SELECTED PROJECTS

Banking Sessions Mexico

Designed the cross-domain session uniqueness model and hard logout contract.

Bank SSO

Designed the migration of the existing data model to a new format and database to support Bank.

Device Signing Recovery

Led the first recovery phase and defined the canary strategy with automatic rollback.

Authprocess

Led the team's first AI-assisted feature end to end, from RFC to production.
